

Pretentious Self-Parsing and Self-Evaluation of λ -Calculus

Heewon Lee

School of Computing, KAIST

October 15, 2026

Motivation

- Reading strings of λ -expressions and evaluating them is itself a computational task.

Motivation

- Reading strings of λ -expressions and evaluating them is itself a computational task.
- Church-Turing thesis: Any computable task can be performed by a λ -expression.

Motivation

- Reading strings of λ -expressions and evaluating them is itself a computational task.
- Church-Turing thesis: Any computable task can be performed by a λ -expression.
- $\Rightarrow$ Lambda evaluation should also be possible with a λ -expression!

Motivation

- Reading strings of λ -expressions and evaluating them is itself a computational task.
- Church-Turing thesis: Any computable task can be performed by a λ -expression.
- $\Rightarrow$ Lambda evaluation should also be possible with a λ -expression!

$\therefore$ Goal: Parse and evaluate λ -expressions using λ -calculus!
